

Where the Conversion Leaks Are

nomadinternet.com · CRO Recommendations · August 2026

The most valuable conversion mechanism on this site is the coverage-check funnel, which is bleeding value due to competing CTAs and ambiguous button labels that dilute the primary action and create choice overload.

Prioritised findings

#	Finding	Severity	Effort	PXL
1	Duplicate how-it-works headings confuse path Repeated 'How It Works' headings create identical-looking entry points, confusing the user's path.	Medium	Low	6/10
2	Competing CTAs split focus Multiple CTAs with no hierarchy create choice overload and dilute the primary conversion path.	Urgent	Medium	5/10
3	Duplicate forms create dead ends Multiple identical CONTINUE forms on the same page create ambiguity about which form advances the funnel and...	High	Medium	5/10
4	Ambiguous CONTINUE button labels The submit button labeled only CONTINUE fails to communicate the next step, increasing cognitive effort at...	High	Low	5/10
5	Pricing shown before qualification Displaying prices before coverage confirmation creates premature commitment barriers and confusion about...	Medium	Low	5/10
6	Price inconsistencies across pages Inconsistent price formatting and values across pages undermine trust in quoted costs.	Medium	Medium	5/10
7	Coverage claims lack verification detail Unsubstantiated coverage claims without a visible coverage map or verification explanation undermine trust in...	Medium	Medium	4/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of

A/B tests produce a significant win, and winners tend to overstate their true effect.
